### Introduction to GDPR Readiness Assessment

A GDPR Readiness Assessment is designed to provide an understanding to organisations on how compliant they are with GDPR. Our established, tried and tested Readiness Assessment methodology is based on the GDPR best practices. The modular methodology ensures we can structure the questions to specific business context, sector and industry the organisation belongs.

The assessment report contains:

- \* Maturity Assessment
- \* Gaps Analysis - missing information that has been identified
- \* Recommendations for gap remediation
- \* Top 3 Quick Wins that have been identified
- \* Top 3 Work Streams to progress

The time and effort taken for the GDPR Readiness Assessment are dependent on the scope of the assessment. The scope is decided at the outset by one of our GDPR Practitioners working with the client to understand the client's organisation and operations.

Call us on +34 602017099 for more information.
